

permaban *Wave*®

The versatile, impact-free plate joint that's easy to install

No straight edges, no impact

Permaban Wave's triple curve design means that there are no straight edges - so MHE wheels pass smoothly across in any direction.

Secure, accurate installation

Wave's narrow top plate aids stability and quick joint levelling, and takes up minor differences in slab levels. Thanks to the curves, concrete compaction under the plate can be visually checked; and installers can finish smoothly right up to the plate.

Efficient load transfer

Wave is compatible with our plate dowels. With a tight-fitting plastic sleeve, these allow horizontal and lateral slab movement as the joint opens, but prevent vertical movement.

Accessories

A range of accessories, including intersections and corner units, are currently being developed. Please ask for details.

One product, many sites

Supplied in mild steel as standard, Permaban Wave is ideal for indoor use across a wide range of applications, including directional traffic areas and internal doorways. Galvanised and stainless steel options are available to special order.

Wave features an extension plate which can be adjusted to suit slabs of between 150 and 200mm (fixed height joints available to special order). One batch of product can therefore be used across multiple job sites, making it an economical choice. Permaban Wave is supplied in convenient 2.4m lengths.

Permaban Wave is CE marked (see website for details).

RCR Flooring Products is the organisation behind some of the
world's best known industrial flooring brands.

We design, manufacture and supply a wide range of products used in the creation of
industrial floors, including Rinol resin coating systems, Permaban armoured joints,
and Rocland floor surface hardeners.

The three brands are united by a commitment to product
excellence, customer support and worldwide service.

Our products have been used in factories and distribution centres for many of the world's
leading companies, and are trusted by engineers, architects and contractors.
